Research Priorities Eligibility/Guidelines

2. Loans, scholarships, fellowships, or grants to individuals

1. Both Acorn ($15,000 maximum including 8% maximum indirect costs) and Oak (over $15,000, and

3. Funds seed or pilot research to gather initial data/organization needed to pursue full funding for

Sterilization product/technology for male/female dogs and cats:

1. Origins of canine illness

2. Projects involving disease induction or injury in animal models

Projects involving disease induction or injury in animal models

4. Applicant must convincingly describe that the proposed project promotes

Achieving lasting change that transforms the lives of humans and pets suffering from

Accepts proposals in three overarching areas:

Surgeon-In-Training Research Grant Program:

1. Patient care

4. Clinical test

1. Investigator

Established programs:

1. Nonsurgical

2. Will fund fellow's salary and benefits for one year

Grants are only available to candidates in ACVS residencies

8. Additional funds received from other sources

1. Dissertations or student research projects
The KL2 awards aim to:

1. Although no limit on award amount, average in past five years has been $98,500

5. Refinement of animal models (emphasis is on Russell & Birch 3R's, not new research model dev.)

Five laboratory animal research subjects:

2. Animal health research projects that may have a shelter component

1. Small companion animal (cats, dogs)

1. PI salary

4. Husbandry

1. Patient care

Equine health and performance

Career Development Awards:

Encourage professional improvement and interchange of knowledge:

1. Residents in the Dept. of Clinical Sciences only

2. Provide a mentoring team to foster translational and team research skills

1. Health

CGS/Royal Canin USA Prof. Dev. Awards for GUTSKI 2021 Travel:

Due by 4:59 pm

1. Indirect costs up to 8%

2. CGS members in training are eligible (must be in good standing)

1. Only one application needed to apply for either Career Development Awards

1. Research support is for 2 years

ACVIM diplomate/candidate Resident Research Program

3. Research

1. Patient care

Advancement of knowledge in canine and feline nutrition and health care

Resident Research Program:

5. Service contracts

Does support:

2. Husbandry

2. Training programs

3. Purchase of capital equipment

5. Veterinary Student Scholar

Veterinary Student Scholar – February

APRILE
NOVEMBER

Eunice Kennedy Shriver Nat'l Institute of Child Health and Human Development grants to research:

1. Studies on impact of HAI in/outside home environment on child/adolescent health/development, as well as therapeutically across lifespan through observational studies, experiments and clinical trials.

NIH/Mars Waltham Human-Animal Interaction Research

1. Impact of HAI on typical and atypical child development and health.

2. For adult population, build empirical evidence base around animal-assisted interventions for those with intellectual/developmental/physical disabilities and those in need of therapeutic and/or rehabilitative services.

3. Eval. of animal-assisted intervention for kids/adults with disabilities or in need of rehab. services.

3. Budgets are limited to $499,999 direct costs per year.

4. Effects of animals on public health, including cost effectiveness of involving animals in reducing/preventing disease.

R03 Small Grant:

Contacts/Links: https://www.waltham.com/grants-awards/

1. Research to examine funding interests at left.

2. Direct costs are limited to $50,000 per year.

3. Maximum project period is two years.

R21 Exploratory/Development Research Grant:

1. Research to examine funding interests at left.

2. Direct costs are limited to $275,000 over a two-year period, with no more than $200,000 in direct costs allowed in a single year.

EVERYCAT FOUNDATION (FORMERLY WINN FELINE FOUNDATION)

Feline health, particularly regarding domestic cats, but all considered

Research Grants:

DECEMBER

Prefer studies that apply to all cats, but interested in projects that address specific breeds.

1. Must be in DVM/PhD program at a college/school of veterinary medicine that currently applies for EveryCat grants.

2. Must have an interest in and work in feline health research.

Also funds feline infectious peritonitis, hypertrophic cardiomyopathy, and lung cancer research.

3. Applicants may be faculty veterinarians, post-doctoral fellows, practicing veterinarians or veterinary students.

NOTE: Addtl requests are released during the year; topics vary; check website for current requests.

4. Maximum grant amount is $30,000; multi-year proposals totaling more than $25,000 will not be considered.

A new fund is dedicated for research on amyloidosis in Siamese-related breeds.

New Investigator Awards:

Contacts/Links: https://everycat.org/the-latest/grants/grant-process/

Feline Investigator Grant Award:

1. Max $25,000, with $23,000 available for research/$2,000 for travel expenses to present results at major veterinary conference.

Feline Genomics New Investigator Grant Award:

1. Areas of interest include genomic-based research that will drive advances in (1) personalized medicine and use of genomic data in clinical decision-making, (2) pharmacogenetics and pharmacogenomics, and (3) genomic data interpretation.

2. Max $25,000 (similar budget conditions as above).
